# Scenario 1

MAIN

Initial conditions:

We only have one Shaft (S1) in the 'Main' Bank

The S1 Cabin is at level L with its Door closed with the Cabin's Travel direction set to: UP

Initiating behavior:

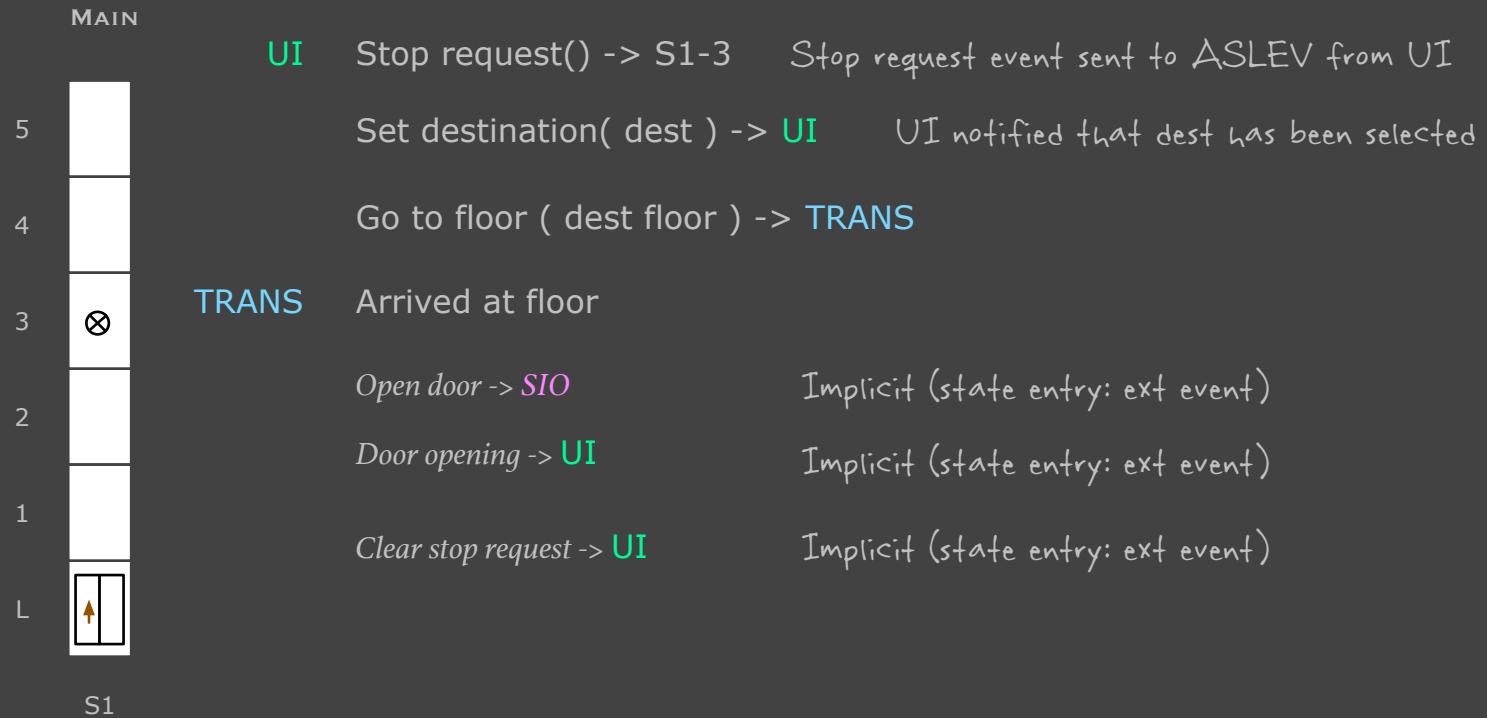

A passenger inside the S1 Cabin selects Floor 3

S1

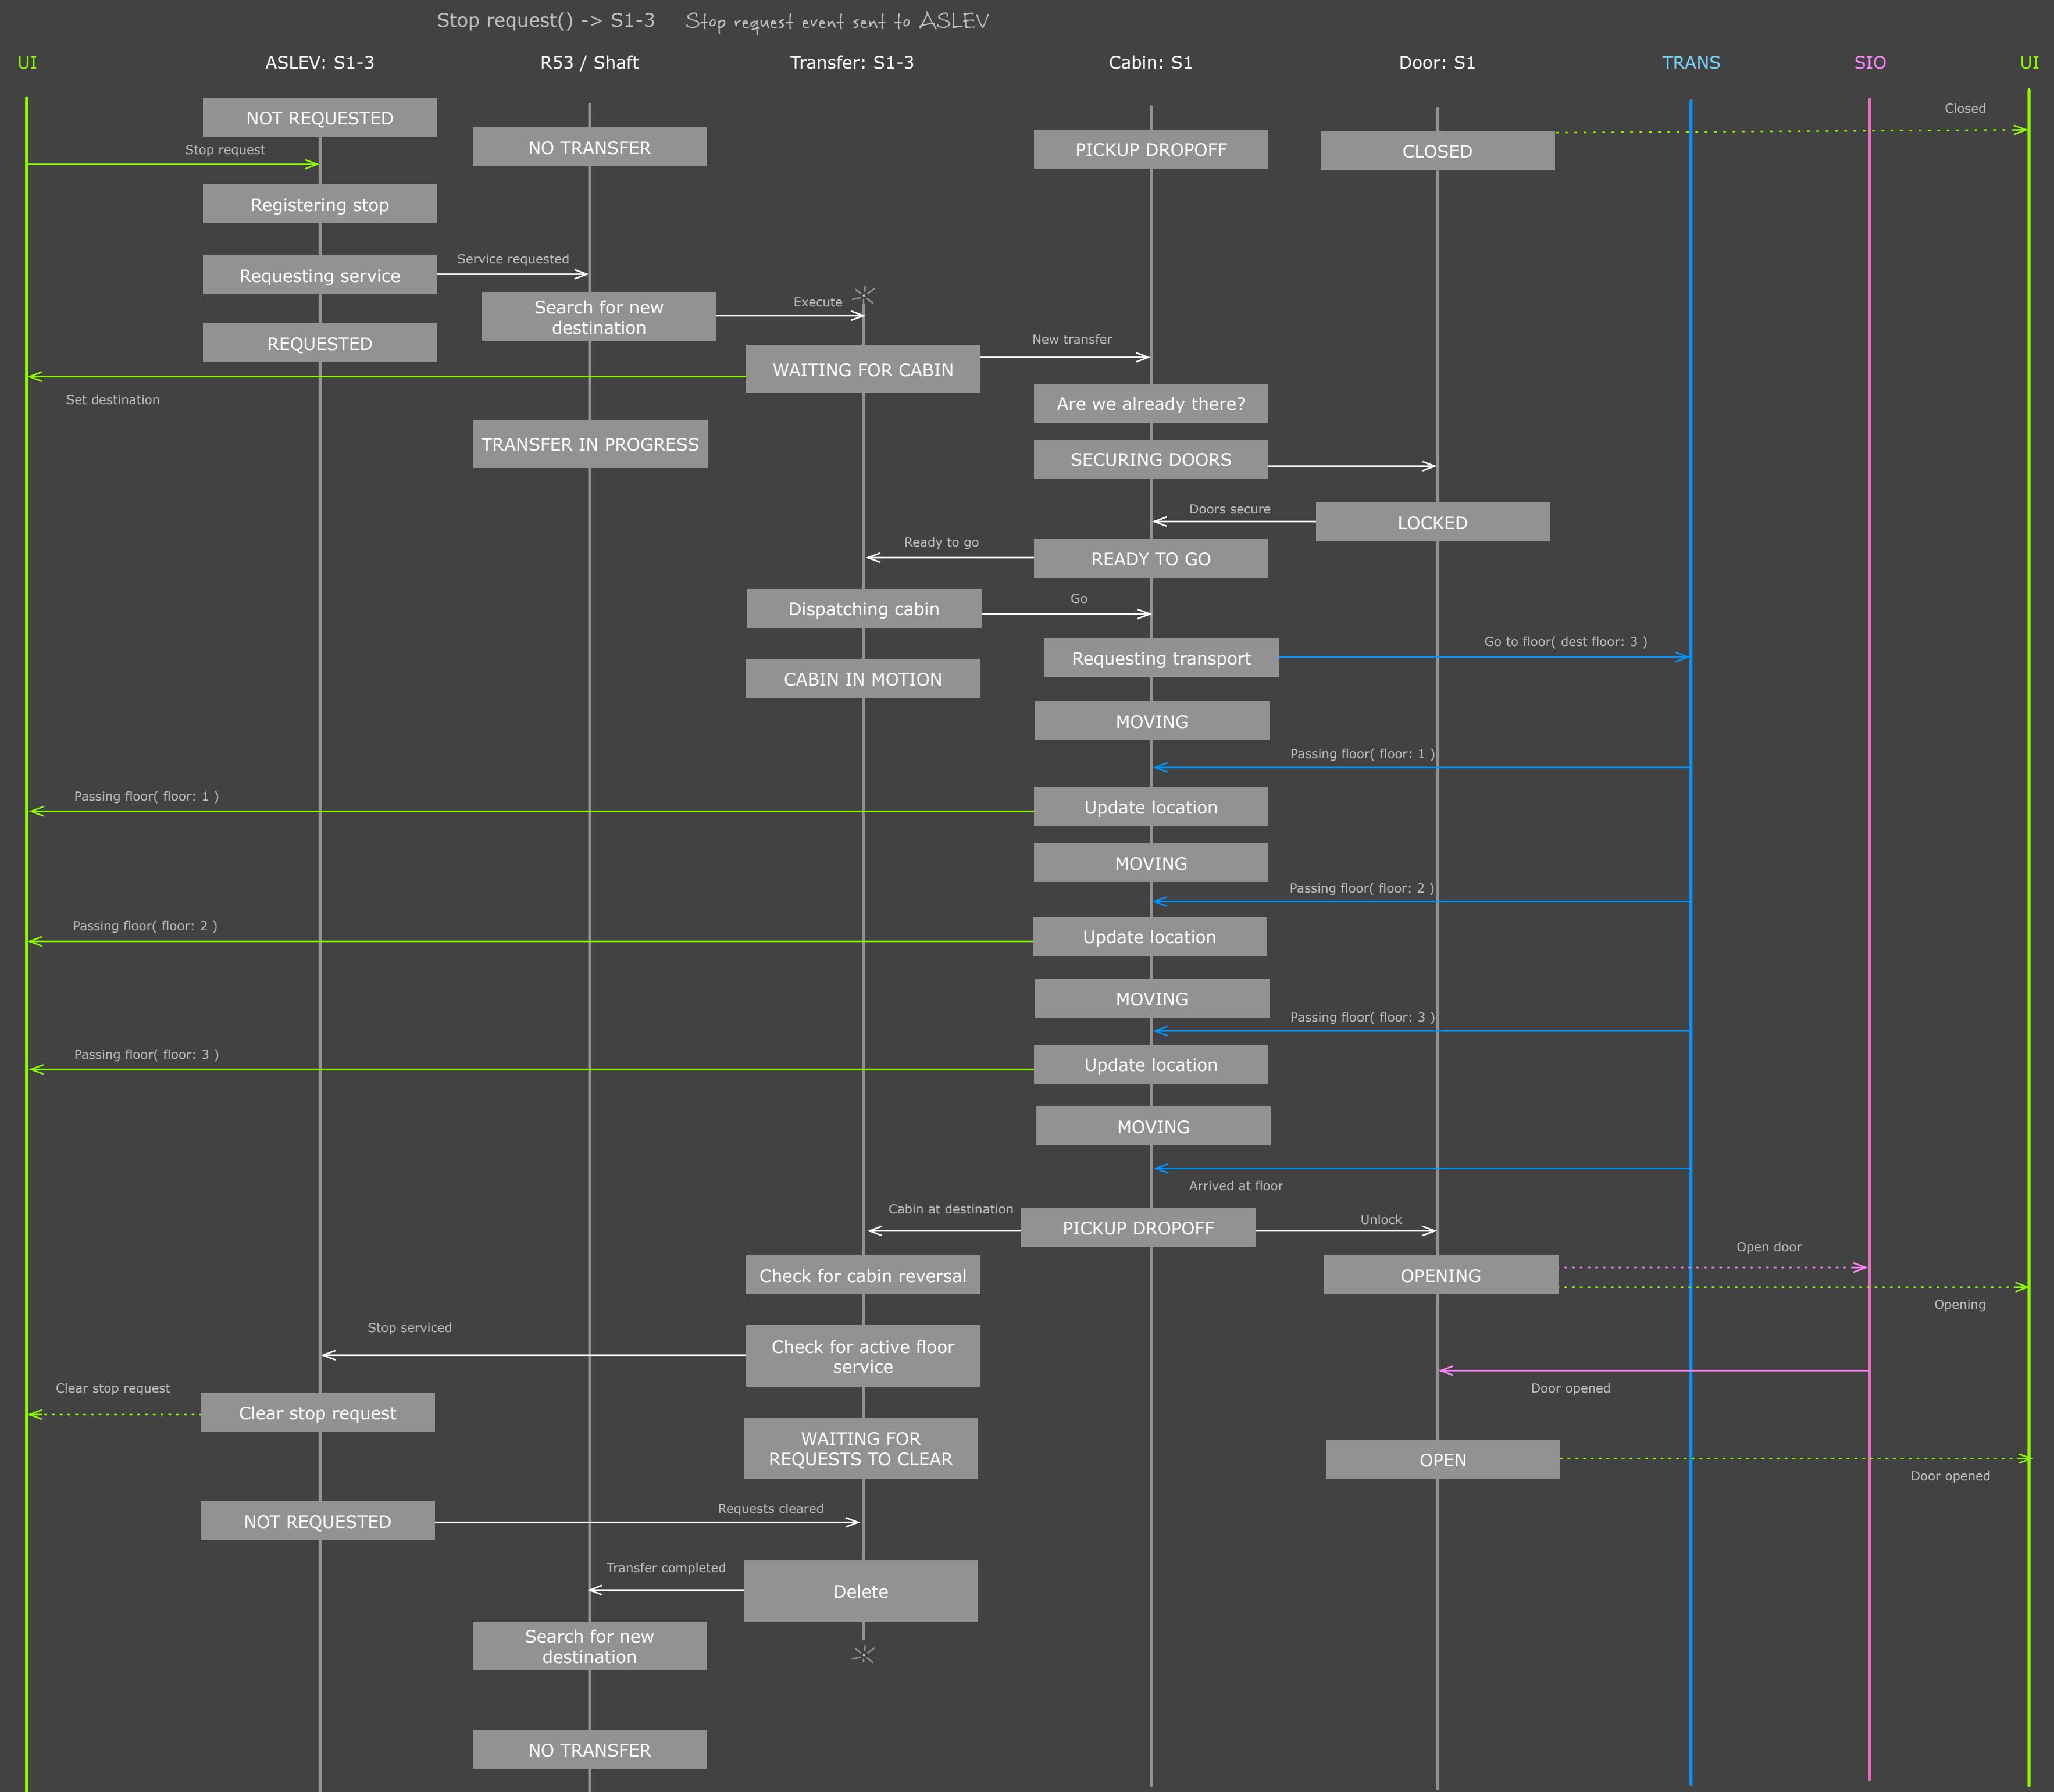

Expected behavior:

Cabin moves to the 3rd Floor and opens the Door

# Scenario 1: External Interactions

## Scenario 1 Internal Interactions

**LOWER FLOORS**
